Prox Offensive Recon Flow Toolkit v0.1

Buen' Dia!
My name is Felix Gutierrez A.K.A Don Trabajo, founder of Prox Offensive Information Security
and Proxima Centauri Productions.
Through active immersion in the present and the communication of lessons learned,
we can make a real difference in the future.

This toolkit is dedicated to lab warriors, lifelong learners, and red team rookies looking
to upgrade their approach to one of InfoSec's most crucial phases: Recon.

Share with others. Engage with your community. Build stronger together.

Tool: Nmap
Purpose: Network & port scanning
Example: nmap -sC -sV -oA scan 10.10.x.x

Tool: CrackMapExec
Purpose: SMB recon + password spray
Example: cme smb 10.10.x.x -u users.txt -p passwords.txt

Tool: WinPEAS
Purpose: Windows privesc enumeration
Example: winPEASx64.exe > out.txt

Tool: Nessus
Purpose: Vulnerability scanning
Example: Web GUI usage + default policies

Tool: OSINT Tools
Purpose: Pre-engagement discovery
Example: theHarvester, whois, shodan, crt.sh

Tool: ChatGPT
Purpose: Recon strategy & synthesis
Example: Use to generate target queries, summarize outputs

As a student of InfoSec, Hip Hop, and fatherhood, I draw from legends like Wu-Tang —
'Wu-Tang is for the children.'
We pass knowledge forward to raise the next generation of tech thinkers and revolutionaries.
